Empowering Vision
Securing Tomorrow

Welcome to CCTV Monitoring

At Sivdio Imaging Sdn. Bhd., we provide structured surveillance and monitoring deployment services for industrial, commercial, and infrastructure environments across Malaysia.

As a CIDB-registered contractor authorised for Mechanical & Electrical (ME) works, including CCTV and low-voltage systems, our focus is on proper installation, system integration, and operational alignment — not standalone technology promotion.

We support organisations that require:

- Structured CCTV installation and upgrade
- Governance-aligned monitoring configuration
- Integration with existing IP infrastructure
- Controlled deployment and documented commissioning
- Operationally aligned system enhancement

Our approach is contractor-led and assessment-based. Every engagement begins with site review, infrastructure evaluation, and scope confirmation before implementation.

Where appropriate, structured monitoring enhancement may be introduced under defined rules and human validation procedures to support operational oversight — without replacing on-ground personnel.

We remain committed to delivering deployment clarity, compliance alignment, and long-term operational support for our clients.

We appreciate the opportunity to support your surveillance and monitoring requirements.

Unleash the power of **Visual Data**

Unlocking Security, Elevating Surveillance

Established in 2013, Sivdio Imaging began a journey fueled by a profound appreciation for visual data's role in modern solutions. Our mission: to pioneer cutting-edge surveillance technologies, transcending traditional boundaries. From inception, our focus was clear: to harness visual data's transformative power to redefine security, monitoring, and efficiency. Through relentless passion and commitment, we honed our expertise, pushing industry standards.

Driven by innovation, Sivdio Imaging remains at the vanguard of technology, constantly striving to surpass expectations. Our expansion signifies a milestone, reflecting our dedication to growth and excellence. With this bold step, we reaffirm our commitment to innovation and customer satisfaction, shaping the future of visual data solutions to empower businesses in an ever-changing world.

Mission

At Sivdio Imaging Sdn. Bhd., our mission is to deliver structured surveillance and monitoring systems through disciplined contractor-led execution.

We are committed to providing properly designed, installed, and commissioned CCTV and monitoring infrastructure that aligns with operational workflows, compliance requirements, and site governance standards.

Through structured assessment, controlled deployment, and documented integration, we support industrial, commercial, and infrastructure operators in achieving:

- Clear operational visibility
- Improved monitoring efficiency
- Structured escalation pathways
- Governance-aligned system configuration
- Long-term infrastructure reliability

Where applicable, monitoring enhancement tools may be introduced under defined rules and human validation procedures to support operational oversight — without replacing on-ground personnel.

Our focus is not on technology hype, but on practical implementation, compliance alignment, and sustained operational support.

**Empowering Operation with Visual Data,
Strengthening Security Through Structured Deployment**

Strengthening Security Through Structured Visual Deployment Structured Visual Intelligence for Operational Oversight

Vision

At Sivdio Imaging Sdn. Bhd., our vision is to become a trusted contractor-led surveillance and monitoring partner across industrial, commercial, and infrastructure environments in Malaysia.

We aim to advance how visual data supports operational oversight — through structured deployment, governance-aligned system configuration, and disciplined implementation practices.

By strengthening integration between installed infrastructure and operational workflows, we support organisations in achieving:

- Clear situational visibility
- Structured security implementation
- Improved monitoring accountability
- Sustainable infrastructure reliability

Our long-term objective is to contribute to safer, more transparent operational environments by ensuring surveillance systems are properly designed, deployed, and aligned with compliance standards.

SOLUTIONS

Structured CCTV Deployment & Operational Oversight

Sivdio Imaging Sdn. Bhd. delivers contractor-led CCTV supply, installation, and monitoring enhancement services for industrial, commercial, and infrastructure environments across Malaysia.

Our approach is structured around disciplined execution, compliance alignment, and operational integration — not standalone technology promotion.

All deployments are assessment-based and aligned to site governance requirements.

• **CCTV Supply & Infrastructure**

We supply specification-driven IP CCTV systems suitable for industrial and commercial operating conditions.

Scope includes:

- Fixed & PTZ IP cameras
- Network Video Recorders (NVR)
- Structured cabling & containment
- Power & redundancy planning
- Storage configuration
- Mounting systems & accessories

Equipment selection is based on site assessment, risk profile, and procurement alignment.

• **Installation & Commissioning**

Installation scope includes:

- Layout planning & risk zone positioning
- Infrastructure setup & camera installation
- Network configuration & secure access
- Testing, commissioning & calibration
- As-built documentation & operational handover

Deployment follows defined commissioning protocols and compliance controls.

• **Monitoring & Visual Oversight**

Systems may be configured to support structured monitoring workflows beyond basic recording.

Support may include:

- Defined monitoring zones
- Escalation workflow configuration
- Incident documentation procedures
- Evidence handling protocols
- SOP-aligned reporting structure

This ensures CCTV infrastructure supports operational visibility and accountability.

• **Analytics-Assisted Detection (Optional Enhancement)**

Where operationally suitable, rule-based detection logic may assist monitoring teams.

Positioning:

- Not a standalone software platform
- Not autonomous enforcement
- Operates under defined parameters
- Requires human validation

May support:

- PPE observation (review-based)
- Restricted zone monitoring
- After-hours movement flagging
- Worker–machine interaction visibility
- Traffic conflict observation

AI-assisted tools support monitoring review — they do not replace personnel.

Structured Surveillance Deployment **CIDB-Aligned Execution**

Structured CCTV Solutions Architecture

Sivdio Imaging Sdn. Bhd. delivers structured CCTV solutions through a layered deployment model aligned with procurement, execution, and operational oversight requirements.

1 Supply & Infrastructure

Specification-driven IP CCTV hardware supply suitable for industrial and commercial environments.

Includes:

- Fixed & PTZ IP cameras
- Network Video Recorders (NVR)
- Structured cabling & containment
- Power and redundancy planning
- Storage configuration
- Mounting & infrastructure accessories

Equipment selection is assessment-based and procurement-aligned.

3 Monitoring & Visual Oversight

Structured configuration to support operational visibility beyond passive recording.

May include:

- Monitoring zone definition
- Escalation workflow configuration
- Incident documentation structure
- Evidence handling protocols
- SOP-aligned reporting

Designed to support operational accountability and situational awareness.

2 Installation & Commissioning

CIDB-aligned Mechanical & Electrical execution under regulated contractor controls.

Includes:

- Site layout planning & risk zone positioning
- Camera & infrastructure installation
- Network configuration & secure access
- Testing & commissioning
- As-built documentation
- Operational handover

4 Analytics-Assisted Detection (Optional)

Operational enhancement layer — not a standalone software platform.

Where suitable, rule-based detection logic may assist monitoring teams under:

- Defined parameters
- Human validation
- Governance-aligned configuration

Supports PPE observation, restricted zone monitoring, after-hours movement review, and workflow-based alerts.

AI-assisted logic does not replace personnel.

Lists Clients

At our company, we are honored to have forged strong relationships with a diverse range of clients and partners who share our commitment to excellence, innovation, and mutual success. These collaborations have enabled us to deliver exceptional services and offerings, driving value for our clients and contributing to our continued growth and success.
